

Specialisterne Canada is recruiting!

Specialisterne Canada specializes in working with businesses to hire people that are on the autism spectrum or who face similar challenges, particularly accessing employment. We are excited to be partnering with Kinaxis to recruit for jobs in the Ottawa area. A description of the role is provided below.

Kinaxis™ is a leading edge software company located in Kanata, Ontario. It's RapidResponse on demand software enables manufacturers and brand owners to drive supply chain management (SCM) and sales and operations planning (S&OP) from a single system. Some of its customers include Cisco, Sikorsky, Qualcomm, and Alcatel-Lucent to name just a few.

If you are looking to make a difference, enjoy challenging work, and want to contribute to next-generation features of world class technology, we would like to hear from you. Kinaxis offers the stability of an established company, combined with the passion and innovation of a start-up. Kinaxis also offers a respectful, supportive work environment.

Specialisterne Canada specializes in working with businesses to hire people on the autism spectrum or who face similar challenges, particularly accessing employment. Specialisterne's unique recruitment and onboarding process avoids many of the natural barriers faced by people on the autism spectrum or who face similar challenges. We are excited to be partnering with Kinaxis to recruit for two positions in the Ottawa area. A description of the role is provided below.

To apply, visit our website at www.specialisterne.ca/opportunities.

Deadline for applications: August 31, 2016.

QA Specialist (Role D-7)

Do you have strong analytical skills? Do you enjoy solving problems? Are you attentive to details and able to use computer tools to spot errors? Do you enjoy finding and fixing errors in software? If you answered Yes to some of these questions, you may have what it takes to join the Kinaxis Quality Assurance team!

Here is what you will do:

- Develop an understanding product specifications for new software features and interfaces;

- Create testing strategies and plans for new software functionality;
- Plan and implement new automated tests;
- Analyze test results and identify root causes for discrepancies;
- Provide testing support for previous product releases;

Here is what you will need:

- A degree, diploma or equivalent experience in computer science or related fields such as mathematics, engineering, electronics or similar;
- Experience in computer programming techniques and languages, including C++, C# or Java (must have experience with at least one of these);
- Passion for creating and delivering effective and efficient software solutions;
- Strong analytical and problem-solving skills;
- Thorough; attentive to details and to achieving specifications;
- Creative approach to solving problems
- Able to understand the user experience and/or business process that is being supported by the application.

Please note: these positions will be filled initially as a temporary 6-month term, but will be converted to 'permanent' status subject to budget approvals and performance at the end of the term.
